

Over The Counter Medication Form

**Maryland Department of Human Resources
Child Care Administration
Medication Order Form**

Regulations permit child care providers to give prescription and non-prescription medication to children in care under certain conditions. Prior written permission from the child's parent is a requirement. If possible, arrange the time of dosage so the child receives the medication at home. Fill out a separate form for each prescription or non-prescription drug.

Non-Prescription Medication

A child may receive only one dose during care, except acetaminophen (Tylenol) and topical medication. A licensed health practitioner must approve the medication and dosage for the child to receive more than one dose.

Name of Child: _____

This medication is being given for the following condition(s): _____
