

**Rising 1<sup>st</sup> Grade Students**

**READING AND MATH**

---

# K into 1

Summer 2022

As you may remember, we usually require some summer reading to be completed by each child so that everyone keeps up their skills and improves their reading in the weeks we are not in school. This summer is no different.

Below you will find the requirements for incoming first grade. We are asking the children to read as much as possible and log their books. As you finish reading a book, please keep a reading log of the books to submit at the beginning of the school year.

In August/ September when school starts, please send in to school your Reading log as well as any library reading logs you may do.

In addition to your day to day reading of books you might consider joining the Anne Arundel County Library Summer Reading program as well. (This is assuming they have the program this year)

Time spent reading with your child is time well spent, please take advantage of this precious time in your child's life as they emerge as avid readers!

Have a Great Summer and Happy Reading!

- **For incoming 1<sup>st</sup> grade students-**
  - we are requiring that all children read or have read to them at least 10 books of their choosing (of course you may always complete more).

## Summer Math ideas

This year in kindergarten we have learned a great deal of math concepts. One very important skill that we have learned and worked on are basic addition/subtraction facts. Students should work on facts to 10 and subtraction from 10. We would recommend working on the following topics during the summer.

List of skills to work on during the summer:

### **Numbers: 0-31**

**Addition:** *plus sign, equal sign, total (sum)*

**Subtraction:** *minus sign, equal sign, total (difference)*

**Measurement:** *more/less, taller/ shorter, longer/shorter, heavier/lighter, balance*

**Geometry:** *2 dimensional shapes, square, rectangle, circle, straight, side, round*

**Geometry:** *3 dimensional shapes, cone, cube, cylinder, sphere, roll, slide, stack*

Dear Parents,

Attached you will find a "summer calendar" filled with simple things to do with your child on a daily basis. These tasks are meant to be more fun and simple so they don't seem like "work." Have your child color in the tasks they complete. Although it is not mandatory, it is recommended to help sharpen skills and quell the "summer slide." These calendars can be returned along with your child's reading log (mandatory) the first week of school.

We hope you have a great summer!!

Mrs. Jones
